

Services

Protection Details

Security Solutions Group specializes in domestic one to three agent Protection Details. However, within the company are experienced international agents. Security Solutions Group can provide service to clients requiring a larger detail if necessary. From one day to multi-week details, Security Solutions Group can provide Protection Details to accommodate your security needs.

Advance Details

Security Solutions Group will provide Advance Detail/Agenda preparation for security details or private clients traveling into the central mid-west region. We can assist with a seamless transition for your security detail upon arrival. From airport to lodging and business meeting facility we will develop an advance briefing for you so you'll be familiar with your travel destination prior to your arrival. We can assist with primary and alternate route planning as well.

Security Consulting

Security Solutions Group offers consulting services for those clients that require detailed assessments of their security infrastructures. They identify hazards and recommend procedures to help reduce risk and vulnerability.

Threat Assessment/Modeling

Security Solutions Group can perform a Threat Assessment for clients who may be traveling to unfamiliar and/or sometimes dangerous areas. Through careful research, interviews and evaluation, we can provide a detailed assessment of the clients risk level. Knowing the level of risk is an important tool in determining what a client's preparedness and security need are.

Travel Security

Clients from time to time will need security during travel periods. Either ground or air, Security Solutions Group can provide travel security for clients needing assistance in between secure facilities.

Stalker Protection

Not as common as it once was, but just as real today, Stalker Protection is available for clients who have that unwanted guest who is just “always there”. Since initial dealings with a stalker are reactionary, any correspondence received from the stalker should be kept for use as evidence, evaluation and implementation of a security plan.

Customized Training Programs

Security Solutions Group is proud to be able to offer Customized Training Programs to organizations, groups or individuals. From basic self-defense to executive protection, edged weapon and firearms training, Security Solutions Group will design and implement your training program based on your needs and wants.

- **Basic Handgun**

Designed as an introduction to efficient use of the pistol, our basic handgun course teaches the core skills necessary to effectively use a handgun.

- **Advanced Handgun**

Picking up where our basic handgun course left off, this class will further the skill sets, techniques and tactics necessary to quickly develop the student’s overall skill with the handgun under duress.

- **Edged Weapons**

Multiple programs of instruction are available to provide the student with effective, outcome-based edged weapons instruction. While our edged weapons courses focus on the use of commonly carried tactical folding knives, we offer instruction in the use of more exotic weapons.

- **Impact Weapons**

From improvised to task specific tools, our impact weapons course integrates the use of stick skills with unarmed tactics.

- **Unarmed Combatives**

The cornerstone of personal protection, unarmed combatives is a fast paced, demanding package designed to quickly develop a student’s unarmed skills.
